

Fabio Della Marra

Affiliation

European Centre for Living Technology and Department of Environmental Sciences, Informatics and Statistics – Ca' Foscari University of Venice (Italy)

Background

Fabio Della Marra holds a MS degree in Computer Science Engineering and a PhD in Economics and Social Sciences from the University of Parma. His doctoral dissertation focused on the macroeconomic forecasting by means of dynamic factor models, under the supervision of professors M. Lippi and S. Sanfelici. He is currently a postdoctoral researcher in Statistics at the Department of Environmental Sciences, Informatics and Statistics at the Ca' Foscari University of Venice and at the European Centre for Living Technology (ECLT).

Current Research

His research in the MEDIUM framework concerns the application of statistical methodologies to analyze the main socio-economic indicators describing the spatio-temporal evolution of Guangzhou during the last decade.
